

**New RemovAll™ Product to be Carried by Rona/Revy Inc.**

Napier Environmental Technologies Inc. is pleased to announce the debut of a new product for both retail and commercial application. RemovAll Antistatic Car Wash is an evolution from the original line of Citrus cleaners and degreasers pioneered by Bio-Wash but never previously brought to market.

The Revy Home Centers have agreed to add RemovAll Antistatic Car Wash to the already broad range of Napier products currently carried through their chain of Revy Home Centers and Revy Home and Garden Box Stores. The Revy group has already initiated an advertising campaign that will commence in March and bring broad public awareness to the product and the RemovAll brand.

RemovAll Antistatic Car Wash will be made available through about 36 stores in Western Canada with the initial stocking order already shipped. The product is sold in a concentrate form with a 2-litre bottle making up to 120 litres and presented on quarter pallet stack out display units. The larger Revy Home and Garden Centres are initially stocking 2-quarter pallets and the smaller stores are carrying 1-quarter pallet.

The Antistatic Car Wash provides numerous unique advantages for both the end user and the environment. The citrus active ingredients provide aggressive cleaning power that can be regulated by varying the concentration to tackle the toughest cleaning challenges, even tar and grease residues. The product does not contain any phosphates and is totally biodegradable. After cleaning, the product actually leaves an antistatic charge on the vehicle that repels the future collection of dust and dirt.

These properties are not only attractive characteristics for the average car owner but a major cost saver for commercial users such as trucking companies, fleet operators, bus lines, and car dealerships where vehicles are washed weekly. Napier has already built strong business relationships with numerous customers that would benefit from such a product and the introductory campaign will continue over the next several months.
